Sowing & Cultivation

Sowing rate 20 - 25 kg/ha

The association of two elite varieties selected for their adaptability and high protein content make MAS ALFA DUO 4 adapted for farmers looking for high forage quality.

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
