Growing recommendations

MAS 26.R can be use in silage and in grain. It has a very good regularity of performance in good situations even in xwater stress situations. This new lancaster genetic brings a good cob/plant ratio and offer high starch content on the silo.

	Optimal conditions	Limited conditions
Adaptation	4 on 4	4 on 4
Density - silage use	95000 Plants/ha	90000 Plants/ha
Density - grain use	95000 Plants/ha	90000 Plants/ha

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
