Growing recommendations

ALIANA is an hybrid for clubroot area. This hybrid is resistant to P1 race of clubroot. In addition to its clubroot resistance, ALIANA has an excellent oil content for more profitability for oil collector. ALIANA is very adapted for conditions with high and medium stress.

	Optimal conditions	Limited conditions
Adaptation	4 on 4	3 on 4
Density at harvest	25 - 35 Plants/m ²	35 - 40 Plants/m ²

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
