

ALBENGA

Group 00

THE PROTEIN MAKER

- **EXCELLENT YIELD**
on the 00 maturity group
- **HIGH PROTEIN CONTENT**
between 42 - 44 %
- **ADAPTABLE USE**
end of 00 group with high yield potential

Characteristics

Maturity **End of 00**
Flower colour **Purple**
Hilum colour **Yellow**
TKW **Medium**
Protein content **41 - 43 %**
Oil content **Medium**
Plant height **High**
First pod height **Medium-High**
Growth type **Indeterminated**

Agronomy

Soil coverage **8**
Ramification capacity **8**
Early vigor **7**
Standability **7**
Drought tolerance **7**

1-3 sensitive - poor | 4-6 medium - good | 7-9 tolerant - excellent

Yield performance

French registration results: 105.9% (French Ministry of Agriculture 2019)

Sowing period adaptation

	Early	Optimal	Late	2nd crop
Adaptation	4 on 4	3 on 4	2 on 4	4 on 4

Growing recommendations

Density at harvest	55 - 60 Plants/m ²
Sowing depth	3 - 4 cm
Pre-inoculation	The shelf life of the inoculum is 80 to 90 days with a storage temperature of 18°C. Lower temperature storage has a positive impact on the lifespan of rhizobia on seeds. We recommend a temperature below 25°C for storage and transport of pre-inoculated seeds. Plan for a double inoculation in the case of a plot that has not had soybeans for more than 5 years and in the case of sowing in erosion.

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
