

MAS 81K

Linoleic

Early

Broomrape E

FOR ALL CULTURAL PRACTICES

- **FLEXIBLE BEHAVIOR**

Fit in all situations

- **EARLY FLOWERING AND SHORT CYCLE**

Suitable for northern regions and all sowing date

- **SHORT PLANT**

For a good plant stability

Characteristics

Flowering **Early**

Maturity **Early**

Oil type **Linoleic**

Plant height **Medium-Short**

Head shape **Flat/Slightly convex**

Head position **Mid erected**

TKW **52 - 61 g**

Oil content **42 - 45 %**

Agronomy

Early vigor

8

Standability

8

Drought tolerance

8

1-3 sensitive - poor | 4-6 medium - good | 7-9 tolerant - excellent

Disease tolerance

Broomrape **E**

Mildew **RM9**

Sclerotinia (head)

Growing recommendations

Mas 81K is able to value a really large range of cultivation conditions thanks to its earliness and a quick filling. Ideal hybrid for farmers who are starting sunflower crop and who would like to limit production risks. Moreover it is particularly interesting in case of late sowings, minimum tillage (need to wait more time for soil heating). Do not hesitate to increase plant density in high potential fields. Be careful to check the optimal harvest stage: natural shelling arrive more quickly

	Optimal conditions	Limited conditions
Adaptation	4 on 4	4 on 4
Density at harvest	68000 - 70000 Plants/ha	65000 - 70000 Plants/ha

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
