Growing recommendations

MAS 59K is a maize hybrid with strong early vigor, good plant stability, and excellent ear fertility. It combines high yield potential with good adaptability, performs well even in less favorable conditions, and offers flexible sowing thanks to its good dry down.

	Optimal conditions	Limited conditions
Adaptation	4 on 4	3 on 4
Density - grain use	80000 Plants/ha	75000 Plants/ha

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
