BYSTANCE CL

Mid early

NO LUXURY BUT IT'S BYSTANCE

• **CLEARFIELD STRATEGY**

To ease the weeding

• **HIGH YIELD POTENTIAL**

Top yield in continental conditions

• **SAFE AGRONOMY TO SECURE HARVEST**

Robustness, lodging tolerance, no elongation

Characteristics

Type **OGU**

Flowering **Mid early**

Growth after winter **Mid early**

Oil content **42 - 44 %**

Protein content **38 - 40 %**

GLS content **16 - 18 µmoles/g**

Agronomy

Early vigor

Stem elongation

Pod shattering

Standability

1-3 sensitive - poor | 4-6 medium - good | 7-9 tolerant - excellent

Disease tolerance

Phoma

Sclerotinia (stem)

8

Leaf lighting spot

7

Dry stem

7

1-3 sensitive – poor | 4-6 medium – good | 7-9 tolerant – excellent

Growing recommendations

BYSANCE CL is the new Clearfield hybrid in the MAS portfolio. It is a typical winter hybrid with excellent performance, especially in continental conditions. Clearfield tolerance allows better weeding. Thanks to its robustness and winterhardiness, it reaches the same or better yield compared to classic hybrids. With good resistance to lodging and to pod shattering, BYSANCE secures its high potential right up to harvest.

	Optimal conditions	Limited conditions
Adaptation	4 on 4	4 on 4
Density at harvest	25 - 35 Plants/m ²	30 - 40 Plants/m ²

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
