

# MAS 8080L

High oleic

Early

Broomrape < E

## A CONCENTRATE OF OIL

- **EXCELLENT OIL CONTENT**  
For more profitability
- **HIGH OLEIC ACID CONTENT**  
With an excellent regularity
- **EARLINESS AT FLOWERING AND MATURITY**  
Perfect for northern areas

### Characteristics

Flowering **Early**  
 Maturity **Early**  
 Oil type **High oleic**  
 Plant height **Short**  
 Head shape **Convex**  
 Head position **Mid erected**  
 TKW **50 - 55 g**  
 Oil content **45 - 47 %**

### Agronomy

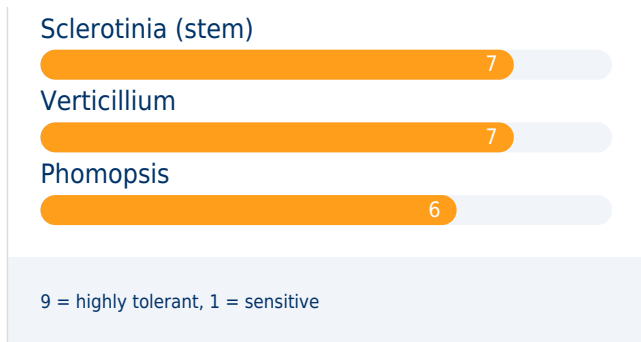

9 = excellent, 1 = poor

### Disease tolerance

Broomrape < **E**  
 Mildew **RM9**  
 Sclerotinia (head)

8

## Growing recommendations

MAS 808.OL is a new hybrid in early oleic market. Its technology values are excellent. It's the perfect solution for oil collectors. With its early flowering date, MAS 808.OL can be sowed in most northern regions or in late sowing. Its very short plant, its look and its yield potential will seduce farmers in the field. MAS 808.OL has all qualities to become the new star in its market segment

	Optimal conditions	Limited conditions
<b>Adaptation</b>	4 on 4	4 on 4
<b>Density (Plant/ha)</b>	75-70 000	60-55 000

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
